# Introduction of Lunar Calendar

● One step in order to create Lunisolar calendar

Objective

To get aware about how lunisolar cycle impact
I.e.

❏   When rain should come.
❏   Agriculture process like when start seeding etc
❏   Lunar cycle affects sleep pattern.

Design Technique

Divide And Conquer

This technique is use as to separate Two classes as follows

1. Class Main
2. Class calendar

Main Class

```
public static void main(String[] args) {
    Calendar c=new Calendar();

    c.october();
    c.input();
```

Calendar

October()

Festival of date()

Festival of month()

Show Birthday()

input()
